EAST LONDON ADVERTISER

A YOGA EXPERT

"Hermit in the Himalayas" is an unusual book, partly travel and partly thoughts upon the ancient wisdom of the east. Paul Brunton, said to know more about Yoga than any living Westerner, became a hermit among the mountains of the Indo-Tibetan border in order to carry out the Biblical Injunction "Be still and know that I am God." We accompany the author on his journey to unfamiliar places and read of his thoughts. "Hermit in the Himalayas" is published at 15s. by Messrs. Rider and Company.

The Hidden Teaching Beyond Yoga

PAUL BRUNTON, Ph.D.

"You have studied and carried Yoga to the Western people; now study and carry the best that India has to give—our higher philosophy." These words were uttered to Dr. Paul Brunton by His Late Highness the Maharaja of Mysore, India's most famous, most beloved, and most revered native Ruler, who was acclaimed by Gandhi as "King-Sage". Thus the leading Western researcher in Oriental Mysticism came to be initiated into the philosophical school of which His Late Highness was also a student.

The first-fruits of this initiation will be found in the present book. The author explains that there has been in existence in Asia, since untraceable epochs, a hidden doctrine which was originally intended for an intellectual élite, as well as for kings, statesmen, generals, high priests and others charged with the responsibility of guiding a people's life. But owing to the immense intellectual growth and scientific advance which mankind has made during the modern period, as well as to the world-wide changes, wars and disruption of human existence, secrecy has lost its ancient value, and the custodians of this teaching now wish it to become available to all who care to know truth. Dr. Brunton has made it available.

The Inner Reality

PAUL BRUNTON, Ph.D.

Paul Brunton is accepted as one of the leading exponents of the Yoga Philosophy to the western world. He has earned that position by deep insight into the true meaning of Yoga, as the nine books now published show. This book is a further step on the path to a deeper revelation of this hitherto little-known subject. Mr. Brunton has convinced the Western world that the Yoga philosophy repays profound study by those who seek insight and aspiration.

"One of those delightful books that tempt you into the deeps of Occultism. Its chief asset is a profound simplicity, which leads you all the while nearer to a more complete understanding of man and the universe. . . . There is not a dull page and hardly a paragraph that does not sparkle with some gem of truth."—Two Worlds. Demy 8vo. 288 pp. 15/-.

The Quest of the Overself

PAUL BRUNTON, Ph.D.

The publishers regard this new book as the most important contribution yet made towards a scientific exposition of those mysterious laws which underlie the discovery of the spiritual being in man through Yoga.

Thousands of readers who found help and guidance in the obscure art of meditation through reading *The Secret Path* will welcome this book, which is the author's response to their desire for a more comprehensive and advanced work.

ERNEST Newman gave this book a one-and-a-half-column highly favourable review in the Sunday Times. "I recommend The Quest of the Overself as by far the safest and most rational exposition of Eastern metaphysic and of the practice of mental discipline that I have yet met."—Monk Gibbon in the Spectator. "A wise, experienced, and inspiring friend that one needs in one's home, whatever the cost."—Psychic Science. "The author's exposition of the Yoga involved is extraordinarily clear and simple, and the book shines with a patent sincerity. It is highly recommended."—Modern Mystic.

The Secret Path

PAUL BRUNTON, Ph.D.

A fully detailed description of the technique pursued by the author in the East, which rewarded him with amazing spiritual experiences. He also reveals a Yoga breathing exercise, safe enough to be practised without the supervision of a teacher, which yields remarkable results. By this method it is possible for every man to discover the deathless spirit within his own being.

"One of the noblest attestations to Spiritual Truth this century has produced."—The Inquirer. Ninth Impression. Crown 8vo. 222 pp. 7/6.

Indian Philosophy and Modern Culture PAUL BRUNTON, Ph.D.

This short thesis on Indian Philosophy will be found particularly valuable to students, since it contains a great number of comparative quotations from Hindu sources correlated in the argument and at the same time associates Western philosophical thought with its Hindu forebear.

A Search in Secret India PAUL BRUNTON, Ph.D.

With a Foreword by Sir Francis Younghusband, who says of the book, "The very embodiment of all that India holds most sacred."

Tells how Paul Brunton wanders through the heart of India, and wins the confidence of those mysterious men—the FAKIRS AND YOGIS.... He beholds their astonishing feats, learns many of their closely guarded secrets, lives in their secluded hermitages and jungle retreats.

"His work is excellent. It has life, colour, movement; and residents of Europe casually interested in the Eastern science of Yoga and in its practitioners will find their interest unflagging from the first page to the last."—The Times.

"You will be unable to deny the fascination or sincerity of his book."—

A Message from Arunachala

PAUL BRUNTON, Ph.D.

The first half of this volume is critical and denunciatory of the shams and falsehoods of Western civilization. The second half is constructive in the best and most spiritual sense. It tells us how to contact the Overself or divine being that dwells in each one of us, and gives us a key to the world of spiritual reality.

The book contains much deep thought and numerous precepts of

great value.

Heaven Lies Within Us THEOS BERNARD

Author of "Land of a Thousand Buddhas" (see below)

"The purpose of this volume", writes Mr. Bernard, "is primarily to reveal the various practices of Yoga in some organized fashion, so that an independent student may have a basis on which he can proceed alone, and I have woven the material around my own personal story. . . ."

Mr. Bernard's "personal story" of how he came to study the principles of Yoga, how he was brought from a state of semi-invalidism to perfect health by Yogic practices, runs parallel, in this book, with his description and explanation of Yoga itself. Not only does he explain the various tenets and exercises of Yoga, but he tells his own experiences as he learned them and what effect they had on him personally. He tells of his trip to India, as a disciple with a fair knowledge of Yoga, in order to get behind the forms of worship so that he could discover for himself the true value that was to be found in the various practices of this "living philosophy". The result is a book that is as absorbing a narrative as it is a lucid and straightforward introduction to the Way of Life taught by Yoga.

The book is illustrated with drawings from an original handwritten Tibetan manuscript on the practice of Yoga, belonging to the author.

Land of a Thousand Buddhas

THEOS BERNARD, M.A., LLB., Barrister-at-Law

In many respects this work on Tibet is unique. Theos Bernard went into Tibet as an earnest seeker in Buddhism and he was welcomed as such by the high Lamaistic officials. There he was privileged to see inside the holy shrines of Tibet, and was initiated into the rites of Higher Lamaism by the Tri Rimpoche, the then highest religious dignitary in Tibet. It is not exaggeration to claim that this is one of the most fascinating books that has ever been written on Tibet, and it is also superbly illustrated. It should attract the lover of travel the world over.

Extracts from Reviews of the American Edition:

"He relates his experiences as the first white person to be admitted within the sanctuaries of Lhasa and produces a unique narrative of travel in Tibet. And even in recording this first reaction and summary the reader used the word 'unique' with a double application: Theos Bernard's story is unique, and so is his way of telling it. His story is a record of personal adventure and observation; and as such—on its thread of unprecedented opportunity—it makes very interesting reading. It holds its own piquant interest, certainly, in its unique events."—New York Times.

"An unusual travel book, particularly outstanding for its photographs."—Time.

"The book we especially recommend you to read this week is an almost unbelievably fascinating report of life in the sacred city of Lhasa in Tibet."—Winnipeg Free Press.

The Occult Causes of the Present War

LEWIS SPENCE

Author of "The Problem of Atlantis", etc.

Are forces darker and more mysterious than those popularly associated with international politics the actual compelling causes of the great upheaval which at present convulses the civilized world? In this work the author reveals the nature and existence of the hidden powers at work behind the Nazi organization, which, he believes, is but the outward, though appropriate, manifestation of Satanist and diabolic agencies which employ it for their own malignant purposes. Not only is the existence of such powers implicit in the arcane history of Germany, but they have survived there for generations, and their traditions, powerful and never-resting, now inspire the Nazi Party, who are the instruments of their diabolical intention, to overthrow the Christian faith and to obliterate Europe's higher life. The machinations of these powers, their desire for war and chaos, the effort to shatter the Christian Churches, to render the people facile and abject, and to inspire them with hateful and demonic ideals, and the evil personalities associated with this Satanic purpose, are shown in their true colours. The book places an entirely new construction upon the greatest struggle in history—the most desperate moment in the age-long conflict between darkness and light. Cr. 8vo. 191 pp. 6 -.

By Paul Brunton

This author was born in London. Early he devoted himself to European travel and his interest in philosophy, literature, art, religion, mysticism. Abandoning a journalistic career he visited Egypt, Ceylon, India and Burma, to study the beliefs and practices of the Yogis, fakirs and holy men. In many cases he was the first white man to penetrate their hermitages and be initiated into their secrets and to their strange fraternities. In 1938 Mr. Brunton visited America, later returning to India.

THE WISDOM OF THE OVERSELF

by PAUL BRUNTON

Author of
"The Hidden Teaching Beyond Yoga,"
"Discover Yourself,"
"The Quest of the Overself," etc.

We are beginning to realize that this war is ushering in a new economic, social and spiritual era. The significance of these world changes and their meaning for mankind are revealed by Dr. Brunton against the background of his present-day restatement of the ancient philosophies. This new volume completes the exposition of the "hidden teaching" which he began in "The Hidden Teaching Beyond Yoga." What was there partially indicated is here completely revealed and the answers to the problems which inevitably challenge the serious inquirer are given as the climax of Dr. Brunton's explanations of the mysteries of death and destiny.

In this version for the modern world of a wisdom and a philosophical system older than civilization, the mystery of consciousness with its transitional states of sleep, dream and after-death is shown as an aspect of the Overself state-of-being, and the final purpose of human existence appears as the conscious merging of the personality with that of the Divine Overself.

Dr. Brunton gives a full description of bodily and mental disciplines which may be practiced to assist in achieving this higher state of consciousness and which have been adapted by him from the esoteric methods of the Orient to the requirements of our Western way of life.

For many years Dr. Brunton has devoted himself to learning and teaching the ancient wisdom, traveling and living extensively in the Orient, particularly in India. He has penetrated deeply into strata of wisdom and mystical experience beyond the reach of the majority of seekers. This volume is the climax of Dr. Brunton's years of study and instruction, and as such he offers it to those who have so far followed him on the upward path, and to all who, at this time in the gigantic clash of the forces of Good and Evil, seek a spiritual anchor and a refuge from the pressures and the maladjustments of a material

FRANZ CARL ENDRES

Die großen Religionen Asiens

Eine Einführung in das Verständnis ihrer Grundlagen Mit acht Kunstdrucktafeln Leinen Fr. 12.50

Je kleiner durch die Entwicklung der Verkehrsverhältnisse die Erde wird, und je notwendiger infolge dessen das gegenseitige Sich-verstehen der Völker wird, desto mehr muß auch die Kenntnis fremder Religionen dem Europäer nahegebracht werden. Diese Aufgabe erfüllt F. C. Endres, der lange Jahre im Orient gelebt hat, mit dem bei ihm stets gerühmten Talent, auch Schwieriges allgemein verständlich darzustellen. Besonders der Islam und der Buddhismus, aber auch der Taoismus Chinas, der Shintoismus Japans, der Hinduismus Indiens werden in diesem Buch dem Leser nahegebracht. Dabei verliert sich der Verfasser niemals in unwichtige Einzelheiten, sondern umreißt die metaphysischen und philosophischen Grundlagen dieser Religionen, nebst der Ethik des Konfu-

zianismus ohne jede Voreingenommenheit und vor allem ohne jedes, das Verständnis der Europäer stets schädigende Gefühl der Ueberheblichkeit. Wer würde nicht gerne die religiösen Grundlagen jener berühmten sufischen Dichtung erfahren, die so sehr auf Europa gewirkt hat, wer wollte nicht die psychologisch so interessanten Wandlungen des alten vernunftbegründeten Buddhismus bis in die bizarren Formen des Lamaismus und der tibetanischen Magie verfolgen? Dies nur, um ein Beispiel aus der großen Fülle des in dem Buche Gegebenen zu erwähnen.

Die Weisheit des Ueberselbst

Leinen Fr. 28.80

Der Verfasser, der sein Leben der Erforschung der tiefsten und verborgensten Lehren allasiatischer Philosophien widmete, hat es in einzigartiger Weise unternommen, da er nun selbst am Gipfelpunkt seines Lebens und zugleich seiner Studien steht, uns als wohl einziger Europäer, der je diese Höhe erreichte, in einer auch dem westlichen Menschen verständlichen Sprache und Deutung die Summe aller seiner Studien und Erfahrungen vorzulegen.

Schon in den ersten Kapiteln erhalten wir Klarheit über die Mentalität des Universums und werden zu der geheimsten Tiefe in uns selbst, dem Ueberselbst, geführt, jenem Göttlichen in uns, das uns zu einem Teil des universalen Weltgeistes macht. Mit dieser Erkenntnis hindert uns auch nichts mehr, das viel gefürchtete Reich des Todes zu betreten, um es mit tiefbegründetem Wissen um das Letzte zu verlassen. Haben wir bisher den Weltgeist als das Göttliche an sich erkannt, so sind wir nun genug vorbereitet, um dem Verfasser die letzten Schleier vor der höchsten Wirklichkeit lüften zu lassen. Aber nicht nur rein wissenschaftlich werden wir zu diesem Ziel hingewiesen: Die letzten Kapitel widmet der Verfasser uns selbst, um uns den Pfad entlang zu führen, der uns in Meditationen über unser geheimstes Wissen schließlich mit dem Yoga des Unwidersprechlichen vom Gipfel in die strahlende letzte Wahrheit blicken läßt. »Friede allen, die diese Zeilen lesen«, schreibt der Verfasser am Ende seines Werkes, und wirklich, Friede in innerer Stille bringt es allen, die es lesen.

Eagerly awaited, this book by Paul Brunton comes freighted with a message of hope to a war-torn world. It is a book for those like the author who find themselves "too troubled by what has been physically seen and personally experienced in this world-shaking epoch to be satisfied with anything less than a fresh living reconstruction".

By the Author of
"The Hidden Teaching Beyond Yoga,"
"The Quest of the Overself," etc.

The Wisdom of the Overself By PAUL BRUNTON

The knowledge of the Overself is the culmination of all human endeavor and all upward aspiration. Dr. Brunton, as the climax of his years of study and instruction, gathers into this volume the pith and essence of all the known and secret wisdom of the thinkers of the East concerning the Overself, that fragment of the Divine which is in each one of us and which makes us a portion of the Universal World Mind.

Paul Brunton says:

"Needed today is not old dogmas but new dynamics."

"The hidden teaching was discovered not in a perfectly unified system but in scores of broken fragments which have been scattered in different lands among Asia's present-day cultural inheritors . . . a doctrine is presented which in all its essential principles is not a local Indian tradition but an all-Asiatic one."

"Human life is not a stagnant pool. There is a sacred something back of us which demands and must have expression and growth, which must break through as inevitably as tomorrow's sun must destroy tonight's darkness." "The liberating study of philosophy reveals that the practical and contemplative factors are both essential to a balanced life."

"Hitler has been only a monstrous symbol of the extreme growth of the materialistic tendencies of our time. His downfall must become a signal that materialism has exhausted its most useful potentialities."

"We are confronted today by a terminal period, an abrupt closing on an entire cycle of planetary history."

"We must bring our minds and morals abreast of the tremendous happenings which have shaken the world."

"I write for the few who, awakened by the world war into seeing that neither dead materialism nor blind mysticism can alone suffice, have had many a question brought to their lips and who therefore seek a higher truth."

"The same war which arouses panic in some men arouses heroism in others, makes them listen and march to a braver music than that to which they were hitherto able to march. Thousands of unknown and obscure soldiers, sailors, aviators, air-raid wardens and civilians have experienced this unexpected reaction during the terrible dangers of the past few years. Why? Because they unconsciously opened the long-locked door of the Overself and experienced its grace."

"He who has once passed through the transforming experience of inward surrender can never again be the same man. . The more the Overself works through him the less does he feel the strain and burden of contemporary living."

We are beginning to realize that this war is ushering in a new economic, social and spiritual era. The significance of these world changes and their meaning for mankind are revealed by Dr. Brunton against the background of his present-day restatement of the ancient philosophies. This new volume completes the exposition of the "hidden teaching" which he began in "The Hidden Teaching Beyond Yoga." What was there partially indicated is here completely revealed and the answers to the problems which inevitably challenge the serious inquirer are given as the climax of Dr. Brunton's explanations of the mysteries of death and destiny.

In this version for the modern world of a wisdom and a philosophical system older than civilization, the mystery of consciousness with its transitional states of sleep, dream and after-death is shown as an aspect of the Overself state-of-being, and the final purpose of human existence appears as the conscious merging of the personality with that of the Divine Overself.

Dr. Brunton gives a full description of bodily and mental disciplines which may be practiced to assist in achieving this higher state of consciousness and which have been adapted by him from the esoteric methods of the Orient to the requirements of our Western way of life.

Here are "ultramystic exercises" which Paul Brunton calls "Yoga of philosophical discernment" and "Yoga of the discerning mind" — names which can be abbreviated to "philosophic Yoga". Differing in conception, purpose, spirit and technique from the ordinary Yoga methods, this "philosophic Yoga" plays an important part in Mr. Brunton's unfolding of Mentalism. \$3.75

PAUL BRUNTON'S

to put into words his feeling about Dr. Brunton's

WISDOM OF THE OVERSELF

(coming Monday, June 21st)

and to tell us why Americans should buy - and read - this book TODAY. He says what he has to say so very well indeed that we pass it on to you. Here it is:

I believe that Paul Brunton's "Wisdom of the Overself" is a book for the new epoch that begins to emerge from the welter of wars, depressions, religious and social collapse which mark the death throes of an age in man's evolution. There is no one of us who has not been the victim of events; no one of us who has escaped from the widening circles of disaster which successively spread throughout the world. And no one of us who has not in bewilderment during reflective moments said to himself: "What does it all mean - what will be the end of all this?"

Such an upheaval in the life of our times has produced its spate of books urging a return to the past; its soothing explanations that all will be well if we but return to the sheltering arms of yesterday. There has also arisen the competing rants of the Isaiahs and reformers who contend that all will be solved by this broad repentance or that program of reform.

But we all want something more than these one-sided views - some approach or some analysis that will reconcile why all this tragedy, with a sound course of action which the individual can follow. Such a reconciliation must also restore our faith in non-material values; it must give us something to which we can wisely cling. I think Paul Brunton's book meets these needs.

And we agree. We have been publishing Paul Brunton's books for some few years, and have watched them slowly evolve through successive stages in this culmination of his research and experience. His new book completes a philosophy that is as much a Way of Life as an explanation of the nature of things; as much a reflection of bright hope for an emerging tomorrow as a probing dissection of a turbulent and unhappy present. In short, we think it a unique book and one we think anyone may read with a degree of benefit limited only by the individual reader's capacity and effort.

THE QUEST OF THE OVERSELF

THE publishers regard this new book as the most important contribution yet made towards a scientific exposition of those mysterious laws which underlie the discovery of the spiritual being in man.

Thousands of readers who found help and guidance in the obscure art of meditation through reading The Secret Path will welcome this new book, which is the author's response to their desire for a more comprehensive and advanced work. Full instructions in clear terms are given here in the Oriental method of psycho-spiritual self-analysis, showing how a student may arrive at his inner divine self by the use of mental methods conjoined to simple breathing and visual exercises.

The finest and safest system of Indian YOGA constitutes the basis of this system, but it has been thoroughly altered and adapted to suit modern Western needs and circumstances. Half an hour a day given to the practices explained in these pages will enable anyone who faithfully follows them to come into memorable contact with his own divine spirit. Every step of the path has been carefully and minutely explained in understandable modern language.

Darkness dwells in Temples made with hands, but "lovely upon the mountains are the feet of those that bring glad tidings."

A Message from Arunachala

ARUNACHALA HILL, in South India, has a high status in Hindu sacred tradition, and Tamil legends hold that it is far more ancient than the Himalayas, which are known to be of fairly recent origin. At the base of Arunachala (which is the Sanskrit for "Red Mount" or "Hill of Light") abides the last of the Maharishees of India, of whom we heard much in A Search in Secret India. This book is due largely to his inspiration and endeavours to give the Western world some inkling of the soulconsciousness that may be achieved by those who are prepared to follow "The Secret Path" outlined in the author's work of that name.

The first half of this present volume is critical and denunciatory of the shams and falsehoods of Western civilisation. The second half is constructive in the best and most spiritual sense. It tells us how to contact the Overself or divine being that dwells in each one of us, and gives us a key to the world of spiritual reality.

The book contains much deep great value.

Hatha Yoga

by THEOS BERNARD, M.A., Ll.B., Ph.D.

Author of "Heaven Lies Within Us" (3rd Impression), etc.

DR. BERNARD deals at length with the many postures, purification practices, and breathing exercises used in the Orient by those Yogis who have attained enlightenment. The extent to which he has succeeded in mastering these practices is partly shown by thirty-six photographs. He shows their effectiveness by describing his own experiences when he underwent the severe discipline of a Yogic retreat while studying under the guidance of a well-trained Yogi in India. In this way he bridged the gap between theory and practice, demonstrating that Yoga is a scientific way to achieve well-being which can be used by a Westerner in the midst of our everyday life.

Healing Fingers

by Rev. P. YOULDEN-JOHNSON, Hon. C.F., B.A., L.Th.

THIS WORK is essentially a practical guide to Yogic, or what the author calls Pranic, healing. Mr. Johnson, who claims that the vital force of Prana can, through the practice of the technique of Yoga, be emitted from the hands to cure patients, has an impressive list of certified cures to his credit.

In discussing the cultivation of this strange power, which enables the author to effect cures to patients at more than 150 miles distance, he takes the reader through an intensive course of Yoga training. And in confirmation of his own successes he adds a lengthy appendix of case-histories and reactions. The book is written for the lawman as well as the professional practitioner.

layman as well as the professional practitioner.

REV. YOULDEN JOHNSON, as well as being a clergyman, is an eminent psychologist. He read Psychology at Durham University, has written a book on Psycho-therapy, and has contributed a paper to the British Journal of Medical Psychology, which was read before Harley Street specialists, with Dr. Ernest Jones in the Chair.

The World's Best-selling Books on Yoga for the West

by

PAUL BRUNTON, Ph.D.

DR. BRUNTON, whose books are best-sellers in more than a dozen different languages, has been justifiably described by a reviewer as the man "who knows more about Yoga than any living Englishman".

Born in London in 1898, Dr. Brunton was educated privately and at St. George's College and the McKinley-Roosevelt College, U.S.A., where he was awarded a doctorate in philosophy.

Early in life he was interested in the arts, literature, comparative religion, mysticism, and philosophy and was a contributor to many journals under different pen-names. He was later Editor of World Trade and a psychology journal, and Literary Editor of the Occult Review.

Abandoning his journalistic career, he travelled extensively in the Orient, investigating the ideas and practices of yogis, mystics, and holy men, and lived among them in monasteries, retreats and hermitages. His researches carried him to Egypt, India, Ceylon, Cambodia, China, Japan, the Tibetan borders, and Siam, where he was presented by the Rajasangha (Supreme Monk) with a Certificate of Honour and the Rajasangha's personal Buddhastatue.

Under the auspices of His Highness the late Maharajah of Mysore, and with the assistance of native pundits, he carried out special researches in the Mysore Collection of Oriental Manuscripts.

THE HIDDEN TEACHING BEYOND YOGA

"YOU HAVE studied and carried Yoga to the Western people; now study and carry the best that India has to give—our higher philosophy." These words were uttered to Paul Brunton by His Late Highness the Maharaja of Mysore, who was acclaimed by Gandhi as "King-Sage". Thus the leading Western exponent of Oriental Mysticism came to be initiated into the philosophical school of which His Late Highness was also a student.

The fruits of this initiation will be found in the present book. The author explains that there has been in existence in Asia, since untraceable epochs, a hidden doctrine which was originally intended for an intellectual élite. But owing to numerous intellectual and scientific developments of recent years in the Western world, the custodians of this teaching now wish it to become available to all who are capable of receiving it. Dr. Brunton has made it available.

A HERMIT IN THE HIMALAYAS

Foreword by PRINCE MUSSOOREE SHUM SHERE OF NEPAL

PAUL BRUNTON, acclaimed as the man who knows more about Yoga than any living Westerner, retired into complete solitude among the mountains of the Indo-Tibetan border in order to carry out the biblical injunction of his Master: "Be still and know that I am God."

In this lonely retreat, under the inspiration of the lofty Himalayas, he has written down a host of unforgettable thoughts that convey to us the sublime inward peace that he found and the inspiring atmosphere of his exalted environment.

It is not easy to classify this fascinating book. It is a literary miscellany—a blend of travel narrative and profound spiritual experience. As we accompany the author on his adventurous journey through the vast ranges of the Himalayas to holy Mount Kailas in Tibet, invaluable hints on Yoga and the mystical practices of the East are conveyed to us against a background of resplendent scenic descriptions; pointed reflections on world affairs and autobiographical reminiscences are interwoven with original animal, Nature, and mountain notes; amid a wealth of unparalleled beauty and grandeur the author confides to us deep spiritual experiences in meditation.

These pages will carry to the readers in stuffy towns something of the crisp air of the Himalayan mountains, and will be of immeasurable value in inwardly preparing them for the exigencies and struggles of modern life.

THE INNER REALITY

Paul Brunton is accepted as one of the leading exponents of the Yoga Philosophy to the Western world. He has earned that position by deep insight into the true meaning of Yoga, as the seven books now published show. This book is a further step on the path to a deeper revelation of this hitherto little-known subject. Mr. Brunton has convinced the Western world that the Yoga Philosophy repays profound study by those who seek insight and aspiration.

The Contents are: Prefatory; What is God?; A Sane Religion; The Mystery of the Kingdom of Heaven; The Seven Beatitudes; Practical Help in Yoga; Psycho-Spiritual Self-Analysis; The Question of Asceticism; The Scripture of the Yogis (Renunciation, Revelation and Realization); Errors of the Spiritual Seeker; The Gospel According to St. John; The Mystery of Jesus.

A SEARCH IN SECRET INDIA

PAUL BRUNTON—of whom, in his Foreword, SIR FRANCIS YOUNGHUSBAND says:

"Remote from the haunts of men, deep in the jungles to which—or to the Himalayas—the holiest men in India always return, Mr. Brunton found the very embodiment of all that India holds most sacred."

Here are the works of a living Englishman whose life is one continuous research in Occult and Eastern Magic, who introduces you to the most mysterious Land of all the mysterious Orient, and in which he opens the windows of her inmost secret caverns and the haunts of the miracle-workers for all the world to see. Having won the confidence of those mysterious men—the Fakirs and Yogis—he beholds their astonishing feats, learns many of their closely guarded secrets, lives in their secluded hermitages and jungle retreats, and presents to the reader one of the most fascinating travel books that has ever been written.

The Author tells us: "I have titled this book Secret India because it tells of an India which has been hidden from prying eyes for thousands of years, which has kept itself so exclusive that today only its rapidly disappearing remnants are left. The manner in which the Yogis kept their knowledge so esoteric may appear selfish to us in these democratic days, but it helps to account for their gradual disappearance from visible history. Thousands of Englishmen live in India and hundreds visit it each year. Yet few know anything of what may one day prove more worthy to the world than even the prized pearls and valuable stones which ships bring us from India."

SOME OF THE MANY REVIEWS:

You will be unable to deny the fascination or sincerity of his book."—Sunday Dispatch.

"A Search in Secret India is a fascinating book."-John o' London's Weekly.

"His work is excellent. It has life, colour, movement; and residents of Europe casually interested in the Eastern science of Yoga and in its practitioners will find their interest unflagging from the first page to the last."—The Times.

"Mr. Paul Brunton penetrated some of the most secret spots and saw and heard most astonishing things."—Daily Shetch.

"His faithful record is worthy of close study by those who see the via mystica as a spiritual road to heaven."—Morning Post.

"No other Western visitor has searched with such patient determination and written of them with such sympathetic impartiality."—Yorkshire Post.

"An absorbing book, the mere reading of which carries you away into unrealized regions of peace and contentment."—Nottingham Journal.

"This fascinating book will be read, and deservedly so, by a large English public."—
Asiatic Review.

A SEARCH IN SECRET EGYPT

This book brings to you the Magic of Ancient Egypt, its Mysteries, its Fakirs, Magicians, and Snake-charmers, with their secrets . . .

Paul Brunton has produced something really new in books about Egypt.

To the ordinary tourist, the Great Pyramid and the Sphinx have become hackneyed. He sees them under the burning sun of Egypt, marvels awhile and perhaps takes snapshots—yet as soon as he has turned his back on them they fade into the backgroun of his mind.

But who would forget a silent night spent, under the starry sky, alone with the Sphinx; who would have courage to pass a second night—of solitude, silence, and darkness—locked in the depths of the Pyramid, as did the author of this book?

He claims to have come in contact with strange forces and to have seen unfold themselves, as on a cinema-screen, the ancient, secret mystery-rites of old Egypt.

CLOSE-UP OF A SNAKE'S HEAD

A tradition has existed for countless ages regarding these Mysteries, but in modern times nobody has been able hitherto to furnish an adequate explanation of them.

His researches in the Temples at Karnak, Abydos, Denderah, etc. brought striking confirmation, from inscribed hieroglyphics and carved wall-reliefs, of his experiences, and his discoveries are linked up with the world's oldest book, the Egyptian Book of the Dead.

While exploring the ancient sepulchres in the Valley of the Tombs of the Kings, the author came across one of those mysterious adepts at the existence of whom Oriental tradition hints. The seer stated that it was his mission to utter a solemn warning as to the very real dangers of ignorantly tampering with the tombs of Egypt's dead.

Various Egyptian wonder-workers were investigated by him. In Cairo he discovered a real medieval magician, who demonstrated his control of elemental spirits and by their means worked apparent miracles.

Here he came in contact with Tahra Bey, Egypt's most-famed fakir,

THE FAKIR WITH PIERCED JAWS AND CHEST

whose feats were astonishing. In the presence of a critical company of medical men, the fakir entered into a self-induced trance, under the influence of which he allowed himself to be stabbed in the throat with daggers by the doctors; to have his jaws transfixed with hatpins and skewers; to be burnt with a flaming torch; and to have a one-and-a-half hundredweight block of granite smashed on his abdomen with a sledge-hammer. At the end of this extraordinary performance, Tahra Bey agreed to be buried alive for an hour and a half, from which experience he emerged none the worse.

In an interview with Tahra Bey, the fakir was persuaded to unveil the arcane but scientific secrets of his powers, thus making public the closely guarded knowledge of the Egyptian fakirs.

In Luxor, the author was initiated into the Rifa-ee Order of Snake-charming Dervishes, and became a pupil of Egypt's most

celebrated snake-charmer, Sheikh Moussa. The author describes with remarkable realism his experiences in handling newly captured, very much alive, fully fanged cobras, on several occasions demonstrating, both in company with the Sheikh and when alone, his mastery of the art. An incantation is given in full.

In a personal interview with the Spiritual Head of Islam in Egypt, many questions on the doctrines and practices of the Muhammedans are answered, and the underlying causes for the widespread influence of that great religion throughout the East are given. Official answers to several questions are supplied—questions which inevitably arise in the Western mind, such as the place of women in Muhammedan countries, and the value of polygamy.

THE BOOK IS ILLUSTRATED BY 75 MAGNIFICENT PHOTOGRAPHS

THE SECRET PATH

Tenth Impression

In response to numerous requests from readers of A Search in Secret India, and at the bidding of one of his spiritual Guides, the author here presents a fully detailed description of the method of meditation which he pursued in the East, a method which rewarded him with amazing spiritual experiences. He also reveals for the first time a hitherto unpublished Yoga breathing exercise, the only exercise safe enough to be practised without the supervision of a teacher, and one which yields remarkable results.

"One of the noblest attestations to spiritual truth this century has produced."—The Inquirer.

A MESSAGE FROM ARUNACHALA

Third Impression

Arunachala Hill, in South India, has a high status in Hindu sacred tradition, and Tamil legends hold that it is far more ancient than the Himalayas, which are known to be of fairly recent origin. At the base of Arunachala (which is the Sanskrit for "Red Mount" or "Hill of Light") abides the last of the Maharishees of India, of whom we heard much in A Search in Secret India. This book is due largely to his inspiration and endeavours to give the Western world some inkling of the soul-consciousness that may be achieved by those who are prepared to follow "The Secret Path" outlined in the author's work of that name.

The first half of this present volume is critical and denunciatory of the shams and falsehoods of Western civilization. The second half is constructive in the best and most spiritual sense. It tells us how to contact the Overself or divine being that dwells in each one of us, and gives us a key to the world of spiritual reality.

The book contains much deep thought and numerous precepts of great value.

THE HIDDEN TEACHING BEYOND YOGA

"You have studied and carried yoga to the Western people; now study and carry the best that India has to give—our higher philosophy!" These words were once uttered to Dr. Paul Brunton by His late Highness the Maharaja of Mysore, India's most famous, most beloved and most revered native ruler, acclaimed by Gandhi as a "King-Sage". Thus the leading Western researcher in Oriental Mysticism came to be initiated into the philosophical school of which His late Highness was also a student.

The first fruits of the initiation will be found in the present book. The author explains that there has been in existence in Asia since untraceable epochs a hidden doctrine which was originally intended for an intellectual élite, as well as for kings, statesmen, generals, high priests and others charged with the responsibility of guiding a people's life. But owing to the immense intellectual growth and scientific advance which mankind has made during the modern period, as well as to the world-wide changes, wars and disruption of human existence, secrecy has lost its ancient value and the custodians of this teaching now wish it to become available to all who care to know truth.
