die Sie warten, kommen nicht. Berufliche Dinge werden spruchreif, die Sie am liebsten noch unentschieden wüßten. Glauben Sie es: Eine Chance, die so lange auf sich warten läßt (und das tut eine in Ihrem Fall), ist dann wirklich keine mehr. **3. 9. bis 12. 9.:** Machen Sie aus einem Hobby einen Beruf. Ihre ewige Unzufriedenheit rührt nur von dem Desinteresse her, das Sie Ihrer Arbeit entgegenbringen. **13. 9. bis 23. 9.:** Treffen Sie die Auswahl unter den beruflichen Angeboten, und dann nicht mehr liebäugeln mit den Chancen, die Sie „versäumt“ haben könnten.

folgreiche Tage. Eine Beschwerde, es sachlich unbegründeter Angriff, den Sie parieren müssen. Ist Ihr Verhalten in einer Liebesangelegenheit wirklich so korrekt, wie es die Zeit augenblicklich verlangt? **2. 3. bis 10. 3.:** Sie dürfen alles tun, nur nicht in einer verzwickten beruflichen Sache aufgeben. Eine kleine Pause einschalten im Kampf um den Erfolg ist erlaubt. Es ist sogar erlaubt, kleine Tricks anzuwenden, um zum Ziel zu kommen. **11. 3. bis 20. 3.:** Glauben Sie nur nicht, daß diese turbulente Woche der Endspurt war. Ganz sicher dann nicht, wenn Sie nach dem 17. geboren sind.

HUMAN P

The world's population is growing by 48,000,000 every year. The latest U.N. survey puts the human flood at 2,000,000, of which roughly half is spread over countries—China, India, Asia and the United States. The present rate of increase continues, and barring "accidents," there will be 6,000,000 people to be clothed and housed by the end of the century.

Most of this increase will take place in the undeveloped countries to

■ **Kidney Stones in Space.** Of all the dangers, ailments, and illnesses that may beset man in space travel, one which may plague him severely is a problem well known in life here on earth: kidney stones. He will be confronted with this "earth problem" because of a condition in space that will stimulate a condition which causes kidney stones on earth. It is the same problem encountered by patients here confined to bed for extended periods of time when they do not get exercise. Dr. B. D. Culver, director of Aerojet-General's space medical laboratory, describes the condition as "stress deprivation." The lack of normal movement in the earth's field of gravity causes a marked wasting of muscles and a rapid loss of the calcium in human bones. The calcium winds up in the kidney system and forms painful and dangerous stones. The space man will be "weightless" because there is no gravity, and will be deprived of the stresses and exercise involved in moving about in the earth's gravity. Unless this problem is solved, he would return to earth probably in need of immediate surgery to remove kidney stones and of long rehabilitation to restrengthen his wasted muscles. Dr. Culver

ACUPUNCTURE

medicine; we hope you get well." Great numbers of Asian people, in China and other countries, follow the traditional methods which do not stem from the germ theory of disease and which do not include the use of X-rays or exploratory surgery. Disease, under this system, is presumed to evidence a loss of harmony, a disturbance in the individual of his balance of *Yin* and *Yang*, the female and male forces. The therapy is to restore harmony by detecting signals in the pulse from the liver, kidney, heart, and other organs. Then acupuncture is practiced: needles are gently inserted into the skin at any of 365 spots related to the organs, in order to stimulate the restoration of harmony.

Dr. Bowers said that the Chinese have great faith in this method of treatment: most patients get well. A modern Chinese author has asserted that there is evidence to prove that acupuncture has a sound anatomical basis. The method has spread to the West and is popular in France, Holland, and Germany. Even in San Francisco's Chinatown one can find acupuncture doctors.

assignment, but the children dutifully complied. One boy traced the outline of his hand, then added a sixth finger and painted each finger in a primary color;

SR/ September 28, 1968

~~the very non.~~ Based on the false assumption that methods are more important than involvement, teacher education too often tells *how* rather than *why*. It presupposes "right ways" and "wrong ways"; it encourages qualitative judgments from young acolytes who have neither the knowledge nor accomplishments to make such judgments.

Not infrequently, three separate art departments compete with one another in the same university, thus splintering a field of study where close interrelationships are basic. Why should the history of art, the making of art, and the training of art teachers be fragmented into autonomous hierarchies? Why, indeed, shouldn't the teacher of art be trained as an artist rather than as a semi-therapeutic dabbler? After all, any teacher worth his salt will invent his own methodology depending on his skills, ex-

What You Can Do About Your **Nervous-Tension Headache**

What Causes It? What's Best To Take?

Emotional stress causes most headaches. Tension (1) causes muscles to tighten (2) Press on blood vessels, reduce blood supply and irritate nerves. This results in (3) more pain, more tension, more pressure on nerves. Your headache gets worse.

What's best to take? Why not the strong pain-relief medication doctors recommend most for headaches? You'll find it in Anacin®. Anacin is a special fortified formula that gives you *twice as much of*

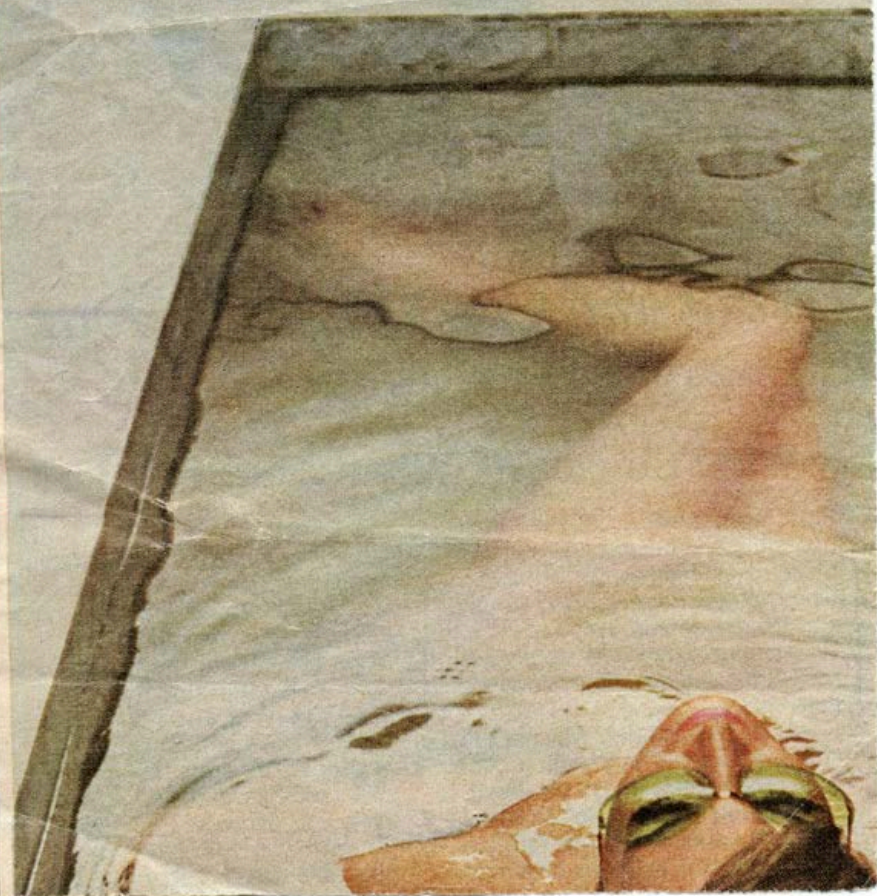

this soothing medication as the other leading extra strength tablet. In minutes Anacin...turns off pain so...relaxes tense muscles...and lets circulation re-establish itself... helps prevent further irritation of nerves. Notice how fast Anacin breaks up your nervous headache —lets you feel better all over.

Despite its strength, Anacin is safe taken as directed. It doesn't leave you depressed, groggy. And it's gentle on the stomach. Next time take *Anacin Tablets*.

all the good

Presenting Sardo®—a true undiluted, undilutable, bath oil. Water can't dilute Sardo's unique formula. That's why 3 out of 4 women treated saw and felt the smoothing difference after *one* Sardo bath. Thirsty dry skin just loves Sardo's rich body emollients. Honestly now. When was

the last time your skin was so smooth?
...could make a difference.
So tonight, relax and let Sardo work its magic.
soft. A new level of skin care.
capful and a little goes a long way.
...it's the best.

Schwarzer Tee als Medizin

(dggk) Tee ist heute das meist getrunkene Getränk auf der Welt - von Wasser abgesehen. Tee ist beliebt wegen seiner erfrischenden, belebenden und erheitenden Wirkung.

In der Medizin wird Tee seit langem als hilfreiches Mittel bei einer Reihe von Krankheiten angewandt, vor allem bei Nierensteinen und anderen Erkrankungen der Harnorgane und des Stoffwechsels, zur Erzeugung von Schweißausbrüchen usw.

Interessante neue Untersuchungen wurden jetzt am Bogomoletz-Institut in Kiew durchgeführt, wobei Mäuse mit Bestrahlungsmitteln so lange behandelt wurden, bis sich bei ihnen Leukämie entwickelte. Die Tiere wurden dann in zwei Gruppen geteilt: Die eine Gruppe blieb ohne Behandlung. Die zweite Gruppe bekam regelmäßige Dosen von Catechins, das sind organisch-chemische Verbindungen, die durch Extraktion von Tee gewonnen werden. Die Tiere der ersten Gruppe gingen zugrunde, jene der zweiten Gruppe wurden wieder gesund.

Eine andere Untersuchung mit Tee als Heilmittel, diesmal an kranken Menschen, wurde ebenfalls in Rußland am Physiotherapeutischen Krankenhaus in

Batum durchgeführt. Nach Mitteilungen aus diesem Krankenhaus zeigten sich regelmäßig durchgeführte höhere Gaben von Tee als wirksam bei folgenden Krankheiten: bei den entzündlichen Prozessen von Rheumatismus und chronischer Hepatitis und zur Reduzierung erhöhten Blutdruckes. Die Elastizität der Blutgefäßwände wurde erhöht. Antibiotische Wirkungen wurden bei Dysenterie und anderen entzündlichen Erkrankungen der Verdauungsorgane festgestellt. Es wurden 14 verschiedene Teearten ausprobiert. Die stärksten antibiotischen Wirkungen wurden von den untersuchenden Ärzten dem „grünen Tee“ zugeschrieben. Bestätigt wurde bei diesen Beobachtungen die alte Erfahrung, daß Tee ein ausgezeichnetes Mittel zur Verhütung und Behandlung von Nierensteinen und Blasensteinen ist. Das hängt zum Teil mit den Xanthinstoffen zusammen (Theophyllin, Coffein), die in Tee wie auch im Kaffee enthalten sind. Sie wirken deutlich anregend auf die Nierentätigkeit. Das ist von Vorteil für den ganzen Körperhaushalt, der dadurch von Abfallstoffen befreit wird. „Thea nigra“ können Sie natürlich auch in Ihrer Apotheke erwerben!

Dr. W. Schweisheimer

sofort mit dem Nachschub aufhört, schon wenn man husten-einleitend das Gesichtchen verzieht. Und die so Geplagte weiß ihrerseits: Wird der Husten erst einmal zur unterhaltenden Angewohnheit beim Füttern, dann ist es nicht mehr fern, daß das Breichen wiederkommt und weitverstreute Spuren sich ausbreiten. Deshalb baut sie Spielzeug auf, Rasselchen und alles, was ablenkt und das Husten vergessen macht. Meist geht das gut. Manchmal aber auch wird im Laufe der Zeit der Husten zur Ablehnungsreaktion gegen alles, was dem kleinen Tyrannen nicht paßt, und schließlich zum Druckmittel gegenüber der Welt der Erwachsenen überhaupt. In ihrer Not gehen die geplagten Eltern zum Onkel Doktor, wo sich dann oft genug das gleiche abspielt und Klein-Martina dem Mann im weißen Kittel „etwas hustet“ ...

Ist sie dann älter geworden, hat sie sicher längst schon das Erlebnis mit dem Husten vergessen. Aber deswegen ist die Urgeste nicht verschüttet, sondern findet ab und zu durchaus noch statt, allerdings diszipliniertes, mit der Hand vor dem Munde, leiser aber doch nicht unhörbar. Vielleicht wird dann die unbewußte Reaktion des Zweifels oder der Ablehnung zu einem distinguierten „Hm“. Vielleicht erlebt sie sie als Räuspern bei ihrem Chef oder als Hüsteln bei ihrem Anbeter, wenn dieser glaubt, sie habe einem anderen zu viel Aufmerksamkeit geschenkt.

So ist das mit dem Husten!

Niesen wird begleitet mit guten Wünschen und Mitgefühl, der Husten mit Zurückhaltung und Distanz, was beides wörtlich genommen werden darf.

Daran laßt uns denken jetzt zur Hustenzeit!

Seien wir freundlich zu dem Huster; er verdient unser Mitgefühl im gleichen Maße.

Eyestrain Warning To TV Viewers

For those who sit for hours entranced and gazing blankly at the glowing screen of a television set, a leading American optometrist, Dr W. R. Jackson, has a warning.

"Television will hurt your eyes if it is not properly used," he says. "It has become one of the greatest boons to American optometrists because it rapidly makes people realise they have something wrong with their eyes."

Six Rules

There were six simple rules that were essential to prevent damage to the eyes through eyestrain. These are:—

- Sit far enough back from the screen. A safe minimum is eight or ten feet.
- Never have the screen on without a diffused light behind the set. Never have a completely dark background. This produces too great a contrast which strains the eyes.
- Never sit at more than a 30 degrees angle from a line perpendicular to the screen.

Never stare directly at the screen. One should always look around occasionally and keep blinking to relax the eye muscles.

Do not make the picture too contrasty; the picture sometimes shows too much contrast between light and dark.

If you are supposed to wear glasses, wear them.

TV But No Bath

Dr Jackson said television seemed to come before anything else in America.

"You may see a little old shack with no running water or bathroom," he said, "but it still has a television set."

Dr Jackson, who is a specialist in contact lenses, said many people who wore them should never do so.

"For those who wear them to the satisfaction of a doctor they can be a great boon," he said. "Things can be corrected with contact lenses

which ordinary spectacles cannot help."

He said he had fitted contact lenses to a six-year-old child. They had been found to stop short sight, which started in the eyes of a child and got worse throughout adolescence.

"Psychologically, however, contact lenses can mean the difference between a good mixer and a social outcast," he said.

Contact lenses were often used to improve the appearance rather than for the general improvement of eyesight.

Dr Jackson gave an example of a schoolgirl who was so unbalanced because of a complex caused by her large glasses that doctors were considering sending her to an institution. The girl was given contact lenses and since then had lived a happy and normal life.

Dominate

er

London

an Common Market
e new session of Par-

pensions, due to changes in administration overseas, have not kept pace with the pensions of former home civil servants.

The Prime Minister in Parliament last July also foreshadowed a kind of "workers' charter," saying that in due course the Government proposed to introduce legislation to lay down a statutory minimum period of notice.

He said: "At the same time, we shall legislate on contracts of service generally. I mean the right of a man to know what precisely are the terms of his contract."

Before the State opening of the new session, Parliament will reassemble next Thursday for the winding-up of the old session — which was merely adjourned, not closed, when the Legislature in August began its long summer holiday.

big nuclear Powers to halt the race before Communist China joins it. The time is short and the 1970s will be too late.

Minister Says Migration Has Not Collapsed

Sydney

The Minister of Immigration, Mr Downer, denied at the weekend that the migration system had collapsed. He was replying to charges made by the New South Wales Minister of Housing, Mr Landa.

Mr Landa said official figures revealed the startling fact that last year nearly 10,000 settlers went back to their own countries.

Mr Downer said it was a mistake to single out the figures for a short period, as Mr Landa had done.

"Last year," he said, "having set a target of 125,000 migrants, we succeeded in attracting to Australia 118,500, short by only 6500.

"This financial year has opened most promisingly and our application figures in the United Kingdom for August have proved a record for this period of the year. The same story can be told of several other countries in Europe."

The spokesman had been asked to comment on a report that a commando of Cuban exiles had threatened to attack British merchant ships with gunboats.

He replied: "It is, of course, one of the duties of Her Majesty's ships to protect the interests of British shipping on the high seas.

"There are ships available on the West Indies station to carry out this duty."

Panama Takes Action

Panama City

President Chiari has forbidden all ships flying the Panamanian flag from engaging in any kind of trade with Cuba.

The decree is a major boost for the United States campaign to put an economic blockade on Dr Castro's regime.

It is estimated that 8000 ships fly the Panamanian flag, most of them foreign-owned.

In Washington a State Department spokesman said Panama's decision, together with similar action by Liberia and the Greek Shipowners' Association, was a significant breakthrough for President Kennedy's policy.

MUSCULAR Low Back Pain

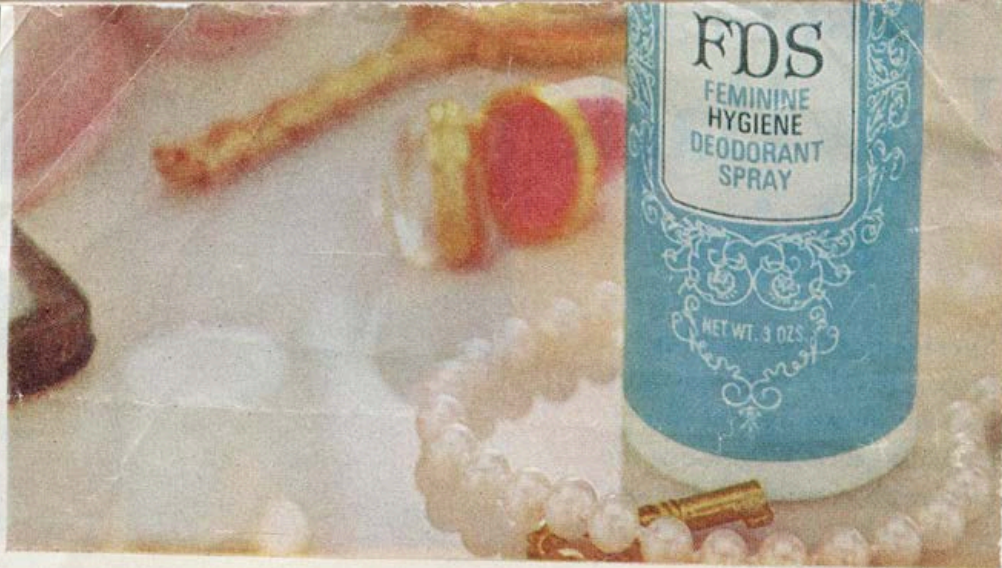

Special fortified formula promptly relieves pain so stiff muscles loosen up and you're back into action. Contains the pain-relief compound doctors recommend most for aching backs.

DOCTORS who specialize in back troubles report most aching backs are due to weak, tense muscles which can go into painful spasm as you suddenly bend, reach or twist. To relieve such backache, doctors recommend the pain-relief compound in Anacin® Tablets. And Anacin gives you *more* of this medication than any other leading tablet.

Anacin is a special fortified formula. It promptly relieves pain, helps reduce swollen tissues, and so releases pressure on sensitive back nerves. Then notice how stiff muscles loosen up and you move around with greater ease.

Only Anacin has this special fortified formula. It's not found in any other product. Let Anacin Analgesic Tablets help *your* aching back.
