Editor's note: This document is at once extraordinary and frustrating. It is obviously a list of the books PB wished to reference, regardless of their compatibility with his own ideas. Unfortunately, this list was partially typed by secretaries whose first language was not English, leading to many errors in the titles or authors listed. We have checked a good number of the entries and corrected them where necessary. Some entries could not be found, and some may not have been checked. We have often corrected the author or title without comment, although in some cases a comment seemed warranted. When a title was crossed out and remained legible, the deleted information was put into a comment. We recommend a thorough review of all the titles and authors in this file. This file was added to over time and is probably not the first iteration of books that PB wanted to have access to. As such the same author may appear in more than one location and with a slightly different listing. Untangling the list is a project we have left for another time. PB arbitrarily used "Addendum" and "Additions" to indicate "unalphabetized" (and we use that term loosely!) authors falling under the relevant first letter of their last name (again, only mostly true). We have standardized this to "Addenda" throughout.

Unlike most files the spelling has not been standardized to UK English; we have listed titles in their native language. Since there is no text here, we did not introduce our para-page identifiers. For more information about the people and texts PB quotes or references here, please see the file titled "Wiki Standard Info for Comments." For more information about the editorial standards, spelling changes, and formatting that we have implemented – including page and para numbering – please see the file titled "Introductory Readers' Guide." We have introduced minimal changes to the text; our changes deal with inconsistencies of spelling, educated guesses at illegible words, and the rare modification of grammar for clarity's sake. Whenever there is any question as to whether what is typed is what PB wrote, please consult the associated scan of the original pages, currently to be found in a pdf of the same name. – Timothy Smith (TJS), 2020
